Out required forms.**

**COURSE INFORMATION
SMT Designation**

**COURSE 1 Boilers, Heating Systems
and Applied Mathematics**

Principles of mathematics that are essential to the operating building systems are taught. Examine the inner workings of boilers, burners, controls, fittings, valves, and pumps, as well as how they connect and interrelate.

**COURSE 2 Refrigeration Systems and
Accessories**

Maintaining the proper comfort level in an office environment is essential for tenant satisfaction. Refrigeration equipment is a key component of an air conditioning system and must be properly maintained and operated at maximum efficiency. This course covers several types of refrigeration systems.

**COURSE 3 Air Handling, Water
Treatment, and Plumbing
Systems**

The fundamentals of human comfort and the components of HVAC systems. Air cleaning devices and indoor air quality concerns are addressed. Water conditioning and treatment, along with plumbing systems, are discussed in the light of present and emerging technology. Fire protection and alarm systems complete the diverse systems reviewed here.

**COURSE 4 Electrical Systems and
Illumination**

Safely operate and maintain a buildings electrical equipment, thoroughly understand the components of electrical systems and how to measure the electrical consumption of your building. How to maintain electric motors and light fixtures.

Note: Should be taken after Course 1

COURSE 5 Energy Mgmt. & Controls

This course will provide a working knowledge of the controls and energy management systems used in typical applications. Developing energy teams to evaluate and monitor energy usage. Preventive Maintenance programs to enhance your properties value and tenant satisfaction.

**COURSE INFORMATION
SMA Designation**

**COURSE 6 Building Design and
Maintenance**

If you are involved in the repair and replacement of structural items such as floors, ceilings, interior wall and windows, you need a basic understanding of building design, materials, codes, and structural systems and finishes. You need to be familiar with maintenance procedures and equipment, grounds maintenance, and preventive maintenance.

COURSE 7 Administration

Focus on leadership skills, oral communication techniques and motivational team-building strategies. Students learn about planning, organizing, scheduling, delegating, budgeting and documenting. This course will help students develop skills in the following areas. Prioritization, Needs analysis, Resource Development, Resource Management and Time Management.

**COURSE 8 Environmental Health and
Safety Issues**

Manage buildings more effectively and to understand and comply with an ever-increasing number of regulations. This course will give an overview of the issues involved with government regulations covering indoor air quality, Asbestos, Hazard communication, Hazardous waste, water pollution control, EPA & OSHA Regulations.

COURSE SCHEDULE

COURSES 1, 3, & 6 Tues. 6 - 9 PM

COURSES 2 & 5 Wed. 6 - 9 PM

COURSES 4, 7, & 8 Thurs. 6 - 9 PM
